Links between work volume and annual and weekly hours worked

Actual annual hours worked per job	=	Annual volume of actual hours worked	÷	Total number of jobs
Actual weekly hours worked per job	=	Annual volume of actual hours worked	÷	Normal number of weeks of employment per year for all jobs

For each job:

Normal number of weeks of employment per year				
=				
Theoretical number of weeks of employment per year (365/7 or 366/7)	–	Number of weeks of holiday per year	–	Number of public holidays converted into weeks
