Producer and Import Price Index in November 2020

Producer and Import Price Index fell by 0.1% in November 2020

The Producer and Import Price Index fell by 0.1% in November 2020 compared with the previous month. The index stood at 97.9 points (December 2015 = 100). This decline was due in particular to lower prices for petroleum products and pharmaceutical preparations. Compared with November 2019, the price level of the whole range of domestic and imported products fell by 2.7%. These are the results from the Federal Statistical Office (FSO).

In particular, lower prices for pharmaceutical preparations and petroleum products were responsible for the decrease in the **producer price index** compared with the previous month. In contrast, rising prices were seen for waste collection and materials recovery as well as for basic pharmaceutical products.

The **import price index** registered lower prices compared with October 2020, particularly for petroleum products as well as petroleum and natural gas. Declining prices were also seen for basic pharmaceutical products, citrus fruit and rubber and plastic products. Non-ferrous metals and products made therefrom, plastics in primary forms, other chemical products and organic products of the chemical industry, on the other hand, became more expensive.

Main results November 2020	Index level (Base Dec. 2015 = 100)	Change in % compared to previous month November 2019		
Producer and Import Price Index (Total) - Producer Price Index - Import Price Index	97.9 98.3 97.0	-0.1 -0.1 -0.3	-2.7 -1.3 -5.3	
Manufactured products - Domestic sales - Exports	100.5 96.1	-0.2 -0.1	-0.9 -1.9	

Quality of results

The current pandemic affects all of society and the entire economy. In this difficult context, the Federal Statistical Office (FSO) must continue to provide public opinion, particularly the country's decision makers and media, with reliable figures. We would like to take this opportunity to sincerely thank our partners who also do their utmost to transmit their data to us under difficult conditions.

In November 2020, it was possible to collect all prices according to the survey plan. The quality of the price collection for the Producer and Import Price Index meets the usual standards.

Applicable prices

The prices of domestic products are surveyed for the domestic market at the first marketing stage (i.e. ex works). These ex works prices include neither valued added tax nor consumption tax (e.g. on tobacco, alcohol or petroleum products).

For exports, net sales prices are surveyed FOB (free on board) which, pursuant to definition, do not include valued added tax.

For imports, prices are surveyed at the Swiss border minus valued added, consumption and customs taxes.

In general, the market prices (transaction prices) for products are surveyed at the time of ordering. Price reductions (discounts) are deducted. Prices in foreign currencies are converted at the exchange rate on the first working day of the survey reference period in Swiss francs. The reference period always covers the period from the 1st to 8th of the survey month. This provision allows the results for the reference month to be calculated and published in the course of the subsequent month.

Producer price index for selected services

Over a period of several years, the producer price index has gradually been extended to the service sector. The latest results are available at (in German):
