

# Poverty rates before and after social transfers, 2020

By different characteristics

<sup>1</sup> This value is based on low case numbers and should therefore be interpreted with caution.

The income data in the SILC 2020 survey relates to the year 2019, i.e. before the Covid-19 pandemic.

Both poverty rates are based on income and do not take into account any financial assets.

In the case of the poverty rate before social transfers in the narrow sense, old-age or survivors' benefits (incl. SB) are included in the household income and are not considered as social transfers.
