

Cercle Indicateurs

Description

The Cercle Indicateurs's system of indicators is designed to measure sustainable development at the level of the cantons and cities. It allows for monitoring over time and for comparisons between cantons and cities (benchmarking). The FSO is responsible for the operation of the indicator system and its conceptual and methodological developments.

Available since:
2005

Methodology

Indicator system

Degree of regionalisation:
Cities and cantons

Periodicity:
Cities: every 4 years
Cantons: every 2 years

Reference period:
Variable, depends on availability of data

Statistical quality of data:
Indicator data are taken mainly from official statistics and from the partner cities and cantons. The indicators meet defined selection criteria.

Policy on revisions

Revisions of the data sources of the indicators are considered when updating the indicators.

In 2022, the structure of the system of indicators and their mode of publication was revised.

Legal bases

Articles 2 and 73 of the Federal Constitution

Organization

Federal Statistical Office (FSO)
Environment, Sustainable Development, Territory
