# Survey on diversity and coexistence in Switzerland

## Overview of the statistical activity

<b>Name</b>	Survey on diversity and coexistence in Switzerland
<b>Abbreviation</b>	VeS
<b>Short description</b>	In the context of cultural diversity, the Survey on diversity and coexistence in Switzerland aims to present an accurate picture of the issues raised by the coexistence of different groups currently living in Switzerland. It collects information on the acceptance, rejection and integration of certain groups of the population. The survey also allows monitoring of trends in society in several areas such as racism, xenophobia, hostility - in particular towards Muslims, black people and Jews - or discrimination. The data collected are used to observe social change and to make detailed analyses. They help to guide policies on social cohesion, integration and anti-discrimination.
