

Regional indicators of the Tourism Satellite Accounts

Description

Tourism is of large importance in many regions. To further capture the cantonal development of this cross-sectional activity, the FSO publishes the annual indicators of the tourism satellite accounts (TSA) at a cantonal level. It is the aim of the regional indicators of the tourism satellite account to capture the direct economic effects of tourism in Switzerland at a cantonal level. Three indicators are recorded: tourism expenditure, tourism-connected gross value added (both at current prices, in million CHF) and tourism-related employment (in full-time equivalent units – FTE).

Available since:

2023

Recorded characteristics:

Tourism-specific economic activities (e.g. accommodation services, food and beverage serving services, transport services)
tourism-connected economic activities
non-tourism-specific economic activities

The aggregation may differ from that of the national results.

Methodology

The Swiss tourism satellite accounts generally use the concepts and definitions of the national accounts. It is the aim of the methodology to record the three indicators by canton and product.

Degree of regionalisation:

Canton

Periodicity:

Annual

Reference period:

Calendar year

Legal bases

The statistics in general and the tourism statistics in particular are based on the following:

Federal Statistics Act (FStatA) of 9 October 1992 (as of 22 December 2003) (SR 431.01)
Ordinance on the Organisation of Federal Statistics of 30 June 1993 (as of 2 April 2021) (SR 431.011)

Ordinance on the Conduct of statistical surveys by the federal Government of 30 June 1993 (as of 23 January 2023) (SR 431.012.1) incl. appendix

Federal Act on Data Protection of 19 June 1992 (FADP) (as of 1 March 2019) (SR 431.112)

Ordinance to the Federal Act on Data Protection of 14 June 1993 (as of 16 October 2012) (SR 235.11)

Organisation

Federal Statistical Office (FSO)
