## 05 Prices

## Producer and Import Price Index in March 2024

## Producer and Import Price Index rose by 0.1% in March

The Producer and Import Price Index rose in March 2024 by 0.1% compared with the previous month, reaching 106.9 points (December 2020 = 100). In particular, petroleum products saw higher prices. Compared with March 2023, the price level of the whole range of domestic and imported products fell by 2.1%. These are the results from the Federal Statistical Office (FSO).

In particular, higher prices for petroleum products were responsible for the increase in the **Producer Price Index** compared with the previous month.

The **Import Price Index** registered higher prices compared with February 2024, particularly for petroleum products, wearing apparel, basic metals and semi-finished metal products. Rising prices were also observed for leather and related products as well as motor vehicles and motor vehicle parts. In contrast, petroleum and natural gas as well as pharmaceutical preparations became cheaper.

Main results	Index level	Change in % compared with	
March 2024	(Base Dec. 2020 = 100)	previous month	March 2023
Producer and Import Price Index (Total)	106.9	0.1	-2.1
- Producer Price Index	106.6	0.1	-0.5
- Import Price Index	107.7	0.1	-5.4
Manufactured products			
- Domestic sales	110.6	0.1	0.0
- Exports	100.6	0.2	-2.2

## Applicable prices

The prices of domestic products are surveyed for the domestic market at the first marketing stage (i.e. ex works). These ex works prices include neither valued added tax nor consumption tax (e.g. on tobacco, alcohol or petroleum products).

For exports, net sales prices are surveyed FOB (free on board) which, pursuant to definition, do not include valued added tax.

For imports, prices are surveyed at the Swiss border minus valued added, consumption and customs taxes.

In general, the market prices (transaction prices) for products are surveyed at the time of ordering. Price reductions (discounts) are deducted. Prices in foreign currencies are converted at the exchange rate on the first working day of the survey reference period in Swiss francs. The reference period always covers the period from the 1st to 8th of the survey month. This provision allows the results for the reference month to be calculated and published in the course of the subsequent month.

---

## Producer price index for selected services

Over a period of several years, the producer price index has gradually been extended to the service sector. The latest results are available at (in German):
