Study and living conditions at Swiss higher education institutions in 2024:
main report

In 2024, fewer students had experienced international mobility

In 2024, 19% of students in higher education in Switzerland had undertaken a temporary study period, work placement or other mobility experience in another country since starting their studies, seven percentage points lower than in 2020 (26%). When surveyed for the first time about their experiences of discrimination, 25% of students said they felt discriminated against in their studies on various grounds such as gender, nationality or language. Many more findings are presented in the main report of the 2024 Survey on the Social and Economic Situation of Students, conducted by the Federal Statistical Office (FSO).
