05 Prices

Swiss Residential Property Price Index in 3rd quarter 2025

Residential property prices increased by 0.8% in 3rd quarter 2025

The Swiss Residential Property Price Index (IMPI) rose in the 3rd quarter 2025 by 0.8% compared with the previous quarter and reached 124.3 points (4th quarter 2019 = 100). Compared with the same quarter of the previous year, inflation was 5.2%. These are some of the results from the Federal Statistical Office (FSO).

In the 3rd quarter 2025, in comparison with the previous quarter, the prices of both single-family houses (+1.5%) and those of condominiums (+0.1%) increased across Switzerland. For single-family houses, prices rose the most in intermediary municipalities (+3.7%), while prices fell the most in urban municipalities of a large agglomeration (−0.8%). For condominiums, the greatest price increase took place in the category of urban municipalities of a small or outside agglomeration (+1.3%). The sharpest fall in prices was seen in urban municipalities of a large agglomeration (−0.9%).

IMPI main results	Index level	Change as a % compared with	
	base Q4 2019 = 100	previous quarter	3rd quarter 2024
3rd quarter 2025			
Total residential property	124.3	+0.8	+5.2
- Single-family houses	125.1	+1.5	+5.1
- Condominiums	123.7	+0.1	+5.4

IMPI – the FSO's residential property price index

The Federal Statistical Office (FSO) has published the Swiss residential property price index IMPI on a quarterly basis since the 3rd quarter 2020. It calculates the IMPI from an average of around 8000 transactions from all regions of Switzerland. The FSO obtains the data from Switzerland's 28 largest mortgage institutions. They cover a very large market share as the vast majority of real estate purchases are financed through a mortgage. In a first step, the data collected enabled the FSO to show price changes since the beginning of 2019. By mid-2023, it was possible to extend the time series and trace it back to the 1st quarter 2017. Price trends are published for single-family houses and condominiums with sub-indices for five municipality types (see below).

The IMPI is an economic indicator that measures the development of market prices for residential property (single-family houses and condominiums) in Switzerland. The index completes Switzerland's price statistics system. These include the Swiss Consumer Price Index (CPI), the Harmonised Consumer Price Index (HCPI), the Rental Index (RPI), the Producer and Import Price Index (PPI), the Construction Price Index (BAP) and the measurement of international purchasing power parities.

Publication of the results and documentation

The survey for the IMPI takes place immediately after the end of each calendar quarter. The results are published approx. one month after the end of the quarter in a press release and on the internet: www.impi.bfs.admin.ch.

More detailed information on the survey and methodology is also available on the website.

Municipality types

The five municipality types for which the IMPI shows individual price developments are based on the FSO's [urban/rural typology and municipality typology](#). They are derived from the municipality typology with nine categories. The differentiation is based on density, size and accessibility criteria (e.g. commuter movements). Of the 2115 municipalities in Switzerland, (municipality status as of 1.9.2025), 24% are urban, 48% rural and 28% intermediate. For the IMPI, three types of urban municipalities were retained, while the three types of intermediate and the three types of rural municipalities were further aggregated into two categories:

1. Urban municipality of a large agglomeration
2. Urban municipality of a medium-sized agglomeration
3. Urban municipality of a small or outside agglomeration
4. Intermediary municipality
5. Rural municipality

An interactive Swiss map with the IMPI change rates by municipality type can be found at: www.impi.bfs.admin.ch
