05 Prices

Producer and Import Price Index in October 2025

Producer and Import Price Index fell in October by 0.3%

The Producer and Import Price Index fell in October 2025 by 0.3% compared with the previous month, reaching 105.0 points (December 2020 = 100). Computer, electronic and optical products in particular saw falling prices. Compared with October 2024, the price level of the whole range of domestic and imported products fell by 1.7%. These are the results of the Federal Statistical Office (FSO).

Falling prices were recorded compared with the previous month in the **Producer Price Index**, particularly for watches, instruments and appliances for measuring and testing, electrical equipment and scrap.

Machinery and petroleum and natural gas in particular were responsible for a fall in the **Import Price Index** compared with September 2025. Prices also fell for pharmaceutical preparations, computer, electronic and optical products, electrical equipment, gasoline and pome and stone fruits. In contrast, coins and non-ferrous metals and products made therefrom became more expensive.

Main results October 2025	Index level	Change in % compared with	
	(Base Dec. 2020 = 100)	previous month	October 2024
Producer and Import Price Index (Total)	105.0	-0.3	-1.7
- Producer Price Index	105.5	-0.2	-1.3
- Import Price Index	104.2	-0.4	-2.7
Manufactured products			
- Domestic sales	110.9	-0.1	0.4
- Exports	98.8	-0.2	-1.9

Applicable prices

The prices of domestic products are surveyed for the domestic market at the first marketing stage (i.e. ex works). These ex works prices include neither valued added tax nor consumption tax (e.g. on tobacco, alcohol or petroleum products).

For exports, net sales prices are surveyed FOB (free on board) which, pursuant to definition, do not include valued added tax.

For imports, prices are surveyed at the Swiss border minus valued added, consumption and customs taxes.

In general, the market prices (transaction prices) for products are surveyed at the time of ordering. Price reductions (discounts) are deducted. Prices in foreign currencies are converted at the exchange rate on the first working day of the survey reference period in Swiss francs. The reference period always covers the period from the 1st to 8th of the survey month. This provision allows the results for the reference month to be calculated and published in the course of the subsequent month.

Producer Price Index for selected services

Over a period of several years, the Producer Price Index has gradually been extended to the service sector. The latest results are available at (in German and French):

2025 revision of the Producer and Import Price Index

Every five years, the methods and structures needed to establish the Producer and Import Price Index are revised to maintain the relevance, currency and quality of the published results. General information on the content of the current revision can be found on our website [Revisions | Federal Statistical Office - FSO](#). The index will be reset to a new base value (=100) in December 2025, with the updated methodology implemented in production starting January 2026. The revision includes changes to the structure and weighting of the baskets of goods, which will be adapted to reflect new production, import and export methods. Further details of the implemented changes will be communicated when the results are published for the first time in early 2026.
