Economic Accounts for Agriculture: estimates for 2025

2025: A very good agricultural year

In 2025, Swiss agriculture is expected to generate a gross value added of CHF 5 billion, an increase of 9.6% compared with the previous year. Output rose by 4.1%, bolstered by good harvests and favourable overall market conditions for livestock production. Production costs remained stable. These initial estimates for the current year are based on the Economic Accounts for Agriculture compiled by the Federal Statistical Office (FSO).
