Swiss National Accounts 2025

Swiss GDP growth stable in 2025

Switzerland's gross domestic product (GDP) increased by 1.6% in 2025 at the previous year's prices. This continued growth compared with 2024 (+1.5%) is linked to strong domestic demand (+2.5 %). Investment in particular (+3.5 per cent) was the main driver of this GDP growth. Gross national income (GNI) at current prices registered an increase of 2.5%, reflecting an improved balance of income with other countries. These initial estimates for 2025 from the Federal Statistical Office (FSO) are accompanied by a revision of 2024 GDP growth at previous year's prices, which is now set at 1.5% compared with 1.4% in the initial estimates.
