

Factsheet – Statistical activity and published results

Swiss Social Insurance Statistics

Description

Swiss Social Insurance Statistics is a publication which provides a comprehensive overview of the individual trajectories of Switzerland's social insurance schemes and presents the 'Total Social Insurance Accounts' (TSIA), the consolidated accounts of the entire Swiss social insurance system. It sets out the latest facts and figures alongside time series data on income, expenditure and capital, as well as the number of benefit claimants, contribution rates and average benefit amounts.

Methodology

Summary statistics, secondary data. The preparation of the Total Social Insurance Accounts (TSIA) requires the analysis of statistics from a wide range of sources.

Periodicity:
annual
