Revision of sustainable development indicator system 2016

The revised MONET indicator system reflects the varied aspects of sustainable development in Switzerland

Neuchâtel, 03.05.2016 (FSO) – **The sustainable development monitoring (MONET) has been revised. The revised system enables monitoring of Federal Council's renewed strategy on the subject by attaching particular importance to the UN's 2030 Agenda goals. The newly designed system is comprised of 73 indicators, 22 of which are new. This range of indicators now allows the topic of gender equality to be highlighted by means of a selection of indicators. The MONET system is published on the internet by the Federal Statistical Office (FSO).**
