2016 Pension Fund Statistics: final results

Pension funds adapt to changing financial markets

Neuchâtel, 18.12.2017 (FSO) – **From 2012 to 2016, pension funds reduced their liquid assets and bonds. In contrast, they increasingly invested in property, shares and alternative assets. This repositioning of investment categories was a response by pension funds to changes in the financial markets. These are some of the final results from the Federal Statistical Office (FSO).**
