## 5 Prices

No. 2018-0102-E

Swiss Consumer Price Index in January 2018

### Consumer prices fell by 0.1% in January

Neuchâtel, 12 February 2018 (FSO) – The consumer price index (CPI) fell by 0.1% in January 2018 compared with the previous month, reaching 100.7 points (December 2015=100). Inflation was 0.7% compared with the same month of the previous year. These are the results of the Federal Statistical Office (FSO).

The decrease of 0.1% compared with the previous month is due in particular to the decrease in prices for outpatient hospital medical services. Prices for air transport also declined, along with prices for clothing and footwear, in particular because of sales. In contrast, prices for overnight stays in hotels, heating oil and electricity increased.

## New weighting of the basket of goods and services

To take into account trends in household consumer behaviour, the weighting of the basket of goods and services has been updated every year since 2001.

The weighting of the CPI basket is based on the results of the annual Household Budget Survey (HBS). This covers a random sample of 3000 private households drawn from the FSO random sample register for surveys on individuals and households whose expenditure is surveyed in detail and extrapolated to obtain the average structure of expenditure. For areas in which the HBS does not provide sufficiently detailed information, other sources of data such as professional statistics and market surveys are used. The new weights of the 2018 basket were calculated from the results of the 2016 HBS.

## Harmonised Index of Consumer Prices (HICP)

In January 2018, the Swiss Harmonised Index of Consumer Prices (HICP) reached 99.95 points (base 2015=100). This corresponds to a rate of change of -0.5% compared with the previous month and of +0.8% compared with the same month the previous year.

The HICP is a supplementary indicator for inflation based on a harmonised method across EU member countries. It provides a comparable measure of inflation between Switzerland and European countries.

The results are published by the European Statistical Office, Eurostat, according to a predefined calendar. The FSO publishes a comparison between inflation in Switzerland and Europe on the webpage [www.hicp.bfs.admin.ch](http://www.hicp.bfs.admin.ch). A methodological notice, the 2018 weighting of the Swiss HICP basket of goods and services and the FSO News publication on the HICP are also available on this page.

The HICP indices for other European countries for January 2018 will be published by Eurostat on 23rd February 2018. You will find the HICP results on the Eurostat webpage at the following address: <http://ec.europa.eu/eurostat/web/hicp>
