

Supplementary accommodation statistics (PASTA)

Description

The **supplementary accommodation statistics (PASTA)** measures supply and demand in commercially-run holiday homes and collective accommodation.

Available since:
2016

Type of survey:
The PASTA is a sample survey. Data are collected quarterly by paper or online questionnaire (<http://www.esurvey.bfs.admin.ch/epasta> ). Participation in PASTA is compulsory, except for natural persons in private households for whom participation is voluntary.

Statistical unit:
The statistical unit is commercially-run holiday homes or collective accommodation (local unit).

The key variables are:

- The number of commercially-run holiday homes or collective accommodation units and number of beds.
- Monthly number of arrivals and overnight stays by visitors' country of residence

Methodology

Degree of regionalisation:
Major region

Periodicity:
Quarterly

Reference period:
Month

Legal bases

Ordinance on the Conduct of Statistical Surveys by the Confederation of 30 June 1993 (RS 431.012.1)
