Risk comparison of selected means of land transport, 2007-2016¹

Risk of death per distance covered,

with the number of fatally injured passengers or users for each means of transport selected. To minimise the influence on results of short-term fluctuations, a period of ten years

was observed (2007-2016). Sources: FSO - Passenger transport performance (PV-L); FEDRO, FSO - Road accidents (SVU);

FOT - New occurrence database
